

Merry Christmas and Happy new year!

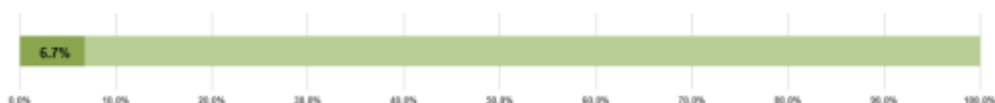

❄️ Let it DO, Let it DO, Let it DO ❄️

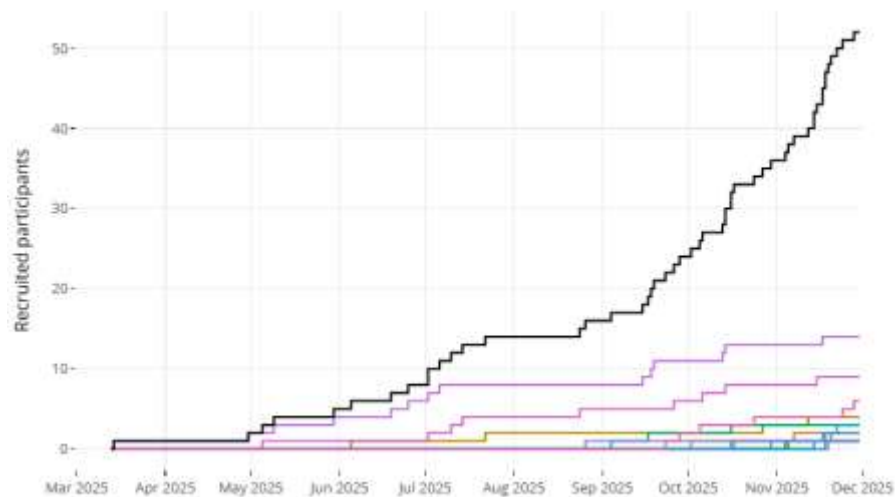

We wish all DO-IT sites a Merry Christmas and a calm festive season. 2025 was a strong year with major DO-IT milestones achieved together. Many thanks to all of you for your incredible support and commitment!

Regulatory approval has been obtained for more than 60 sites across Germany, Spain, the Netherlands, Belgium, Portugal, and Switzerland. Around 30 sites are already open and actively recruiting, with further site initiations planned for the coming year. The second EU submission wave is under review in Austria, France, Finland, and Norway, with site openings expected in early 2026. Submissions in the UK, Canada, and Australia are in preparation. Important co-funding has been secured from the British Heart Foundation, the Dutch Heart Foundation, and PHRC-N in France. Recruitment is progressing as planned, with the first patient randomized in Bern on March 14th and 61 patients enrolled to date. Many thanks to all teams for their excellent commitment.
